

Good afternoon,

There is also a copy of the 2024—Mathieson Imagery Standards Rates along with our Letter of Introduction; we would like to provide this to all our clients to show that we are a fair and reasonable business. We have carefully considered creating these rates.

As shown on the PDF, this document is 'Confidential,' we ask that you please respect this when requesting quotes from both us and our competitors.

The following link will take you to our Dropbox folder, which showcases some projects we have worked on over the years.

Note: - We ask that you only use our rates as a guide, as every project differs.

Our rates were carefully drafted to accommodate the diverse needs of our clients and reflect our experience across various sectors and industries. From basic still photography to large-scale productions, we have considered numerous project scenarios to create the 2024—Mathieson Imagery Standards Rates.

We are very proud to advise you first that Mathieson Imagery has upgraded its RPAS (Drones) fleet and now can provide additional services such as: -

- Aerial Mapping Services with RTK/GNSS instruments provide centimetre accuracy utilising our LIDAR Payload capabilities.
- Provide a range of outputs, including Orthomosaic, RTK, LIDAR, DTM, DSM, DEM Topographical, Cut and Fill Volumetric Calculations, 3D Imagery, Flood-Water Analysis assisting Emergency Services and more.
- Thermal Array Inspections and reporting (Thermography)
- High-quality Aerial/Terrestrial footage is required for Project Progress Reporting and updates, including Time-lapse cameras.
- Forensic Photography is used not only for criminal activities but also to assist in industrial/civil reporting and investigations.
- High-quality Terrestrial imagery (stills and footage) is used for various services in numerous industries, from still imagery to total commercial production, including live streaming of events.
- All Processing is completed offline using state-of-the-art software suites.
- All completed projects can be delivered via various means, including external hard drives, drop boxes (preferred), Google Drive, One Drive, and more.
- On special request, we can provide: -
 - o Water sampler
 - o Air and Gas sampler
 - o Magnetometer surveys and.
 - o Multi-Spectral scanning

Note: Due to their uniqueness, these payloads are hired/leased on a project-by-project basis. If you have a project that could benefit from these resources, let us know, and we can discuss the best way to proceed. This means we can offer more comprehensive solutions, faster turnaround times, and higher-quality results for your projects. This is a way to incorporate them into your project plan.

With the additional equipment, we can increase the number and types of services we can provide our clients. This means we can offer more comprehensive solutions, faster turnaround times, and higher-quality results for your projects.

Our two main offices are in Mount Isa, Queensland, and Shellharbour, New South Wales. We also have satellite offices in Brisbane, Sydney, and Bundaberg. The satellite offices help us when away from our home offices. They can benefit our clients by reducing travel and accommodation allowances when travel and time are required on projects. Our proven track record of successful collaboration in our network means we enjoy working with companies like yours, and **travel is something we are not afraid of.**

This is one reason Mathieson Imagery has been working with another small business in Sydney, New South Wales, for several years. We have a proven track record of successful collaborations, from small social media projects to large-scale productions such as Australian Survivor, Coca-Cola Christmas Truck Adventures in the Outback, Adventure and Travel TV Shows like The Weekender, National News, Publication, real estate companies, and more.

Our partner has been working in the Film and Television industry for quite some time, has risen through the ambition to become a DOP (Director of Photography), and has worked on national and international projects, from brand advertisement to Major Motion Pictures.

Mathieson Imagery is fully CASA Licensed and Certified (REOC #7190) for Aerial operations and holds \$20 million in Public Liability Insurance.

We are happy to provide any required documents/certificates when requested.

We are excited about the possibility of collaborating with you on your project and look forward to the opportunity and more. Your input and vision are essential to us, and we are committed to working closely with you to bring your project to life.
