

Good afternoon,

Mathieson Imager would like to provide this to all our clients to demonstrate that we are a fair and reasonable business. We have carefully considered the creation of these rates.

As shown in the PDF, this document is 'Confidential. Please respect this when requesting quotes from us and our competitors.

The following link will direct you to our Dropbox folder, which showcases some of the projects we have worked on over the years.

Please note that we recommend using our rates as a guide only, as every project is unique.

Our rates were carefully drafted to accommodate the diverse needs of our clients and reflect our experience across various sectors and industries. From basic still photography to large-scale productions, we have considered numerous project scenarios to create the 2025 —Mathieson Imagery Standards Rates.

We are immensely proud to advise you first that Mathieson Imagery has upgraded its RPAS (Drones) fleet and now can provide additional services such as: -

- Aerial Mapping Services with RTK/GNSS instruments provide centimetre accuracy using our LIDAR Payload capabilities.
- Provide a range of Outputs, including Orthomosaic, RTK, LIDAR, DTM, DSM, DEM Topographical, Cut-and-Fill Volumetric Calculations, 3D Imagery, Flood-Water Analysis assisting Emergency Services with sub-centimetre accuracy, and more.
- Thermal array inspections and reporting (thermography) are fantastic for solar panel arrays and solar farms in terms of inspections and fault finding. By reducing the safety requirements for workers who must go on-site for repairs, workers can work at heights only after identifying faults. This drastically reduces the Time, Money, and Safety of any operations in the Commercial or Domestic Markets.
- Forensic Photography is used not only for criminal activities but also to assist in industrial and civil reporting and investigations.
- High-quality Terrestrial and Aerial Imagery (stills and footage) is utilised for various services across numerous industries, ranging from still imagery to comprehensive commercial production. These include but are not limited to Live Streaming of Events, Project Progress Reporting and updates, Time-lapse shoots, and Real Estate packages.
- All Processing is done offline using state-of-the-art software suites, and all our work is completed using state-of-the-art systems, hardware, and software packages. All projects are then stored offline in our secure storage drives. When you ask, previous projects can be retrieved for a small fee.
- All completed projects can be delivered via various means, including external hard drives, drop boxes (preferred), Google Drive, OneDrive, and other secure file-sharing services.
- On special request, we can provide: -
  - o Water sampler
  - o Air and Gas sampler
  - o Magnetometer surveys and.
  - o Multi-Spectral scanning

Additionally, they are excellent for BIM, Infrastructure, and Construction projects across a wide range of markets.

**Note:** Due to their uniqueness, these payloads are hired/leased on a project-by-project basis. Please let us know if you have a project that could benefit from these resources, and we can discuss the best way to proceed. This means we can offer more comprehensive solutions, faster turnaround times, and higher-quality results for your projects. This is a way to incorporate them into your project plan.

- **Expectations:** - What outputs are you expecting (all requirements you need for the project, such as units of measurements, Topographical Contours, DTM, DEM, 3D modelling, LIDAR, Thermal Inspections, Point-Cloud Datasets, AR, Detail levels, GSD, Time-Lapse, Hi-Res Maps, production showcasing your project and more)?
  - We would appreciate any **locations** and KML or KMZ files that can be supplied. We would also appreciate Mud Maps or Hand-Drawn Maps showing project boundaries.
- **Timeframe/Timelines** - Critical when working on active sites.
- Mathieson Imagery may need to conduct or attend any **safety briefings and inductions**.
- Any **Third Parties** that Mathieson Imagery may work with throughout the project and their POC - All personnel must be aware of **RPAS activities as CASA mandatory safety precautions**.
- Mathieson Imagery and our business partner hold various **certifications and licencing** in their industry-specific areas, such as: -

#### Aviation

- CASA REOC – Remote Operator Certificate
- CAS RePL (Remote Pilot Licence)
- CASA (AROC) - Aeronautical Radio Operator Certificate

#### Commercial and Residential

- QLD Government White Card and a Blue Card
  - First Aid and CPR
  - Thermography – Level One Certified Thermographer (IPI)
  - Gas and Plumbing
  - Limited Electrical
  - Pix4D Mapping and Survey Software
  - ADOBE Suite for photo editing and processing of
  - 3D Dataset, Property Mapping, and Floor/Site Plans
  - Virtual Walk Through
  - Various vehicles and Equipment Certifications for on-site works
- **Budget?** This must always be asked of us; we are very flexible in terms of cost when working with such a variety of projects in different areas.

With the additional equipment, we can expand the range and types of services we offer to our clients. This means we can offer more comprehensive solutions, faster turnaround times, and higher-quality results for your projects.

Our main offices are situated in Mount Isa and Brisbane, Queensland, as well as Shellharbour, New South Wales. Additionally, we have satellite offices in Brisbane, Sydney, and Bundaberg. These satellite offices assist us when we are away from our main offices. Having these locations provides benefits to our clients by reducing travel and accommodation expenses when they are required to be on-site for any project period.

This is evident in our newest partner, JRW Gas and Plumbing, located in Brisbane, Queensland. By working in collaboration, we have not only expanded our operational footprint but also increased the services we can provide to our current and future clients.

JRW Gas and Plumbing is a small, family-owned Australian Business in Regents Park, not a company or corporation. So, straight away, you receive the personal touch.

We still provide all of the same services that the larger companies and corporations do, just at a fraction of their costs.

This enables us to offer our customers the little extras that larger companies and corporations cannot.

We strive for excellence and quality, not money and quantity. We do things right the first time, so there is no extra expense for you. Day.

So, what are you waiting for? Please reach out to us today and see how we can solve all your Plumbing, Drainage, and Gas problems.

Mathieson Imagery has also been working with another small business located in Sydney, New South Wales, for ten years.

Flame Tree Pictures has a wealth of successful collaborations, from small social media projects to large-scale productions, including: -

- Australian Survivor
- Coca-Cola Christmas Truck Adventures in the Outback and Coast
- Adventure and Travel TV Shows like The Weekender, as well as
- National News,
- Publications,
- Real estate companies, and more.

Flame Tree Pictures has risen through ambition to become a DOP (Director of Photography), and has worked on National and International projects, from Brand Advertisements to Major Motion Pictures.

Mathieson Imagery is fully CASA Licensed and Certified (REOC #7190) for Aerial operations and holds \$20 million in Public Liability Insurance.

Our proven record of successful collaboration within our network means we enjoy collaborating with companies like yours; We're not afraid of travel.

We are happy to provide any requirements or certificates upon request. We are excited about the possibility of collaborating with you on your project and look forward to the opportunity and to exploring further possibilities. Your input and vision are crucial to us, and we are dedicated to collaborating closely with you to bring your project to life.
